

01

AFGHANISTAN'S LEADING MINING COMPANY

MESSAGE FROM THE PRESIDENT

"Amania Mining is the first international standard mining company that is 100% Afghan-owned. We are dedicated to developing the capacity of the mining industry within Afghanistan using the latest in methods and technology. Amania Mining is leading the way forward, not just for Afghan mining, but for economic prosperity for the country and its people".

02

AFGHANISTAN'S FIRST SUCCESSFUL COMMERCIAL MINING PROJECT

MINING

Amania Mining is a 100% Afghan-owned mining company based in Kabul, Afghanistan with regional offices in Dubai, UAE. We are dedicated to the development of the mining industry in Afghanistan, leading by example we hope to mold the future of the extractive industries in the country.

INTERNATIONAL STANDARDS

We pride ourselves on being 100% Afghan-owned and working towards the development of our Afghan team to perform their duties to international norms and standards. We are working along side international experts to develop the capacity of our team, project sites and create technical expertise locally.

COMMUNITY DEVELOPMENT

Our projects provides local employment, training and development for otherwise forgotten and rural regions. We work along these communities to develop infrastructure and community support. For the first time in years genuine business growth is being seen in remote areas within Afghanistan.

MINING INVESTMENT

Amania Mining has made substantial investment in its flagship mine. We are the first mining company in Afghanistan to have completed detailed exploration, exploitation and sales of our products to international markets.

TRAINING AND DEVELOPMENT

Amania Mining is working towards ISO Accreditation and believes in strong management foundations coupled with employee training and development. Our business is our passion and we empower the local people to work with us in developing a bright commercial future in their communities.

COMPANY OVERVIEW

Amania Mining is not only one of the largest private sector natural resource companies in the region, but also one of the few who are working in the extractive industries in Afghanistan.

Amania Mining is headquartered in Kabul, Afghanistan with regional offices in Kandahar and Dubai, UAE. We have grown into a large multifaceted firm employing over 200 people from a range of nationalities, including many local Afghans.

Our projects have paid back to the community in terms of aid, education and income for the local community. We continually focus on expanding our support to the country, whilst also using the latest in technology to maximise our sustainability efforts.

We are currently developing the Bakhud Fluorite Deposit, located south-east of Afghanistan, with an estimated 8,800,000 tons reserve averaging 47%CaF₂.

Amania Mining has the largest and most advanced mining operation in the country and plans to become a key player in the worldwide mineral and commodity supply.

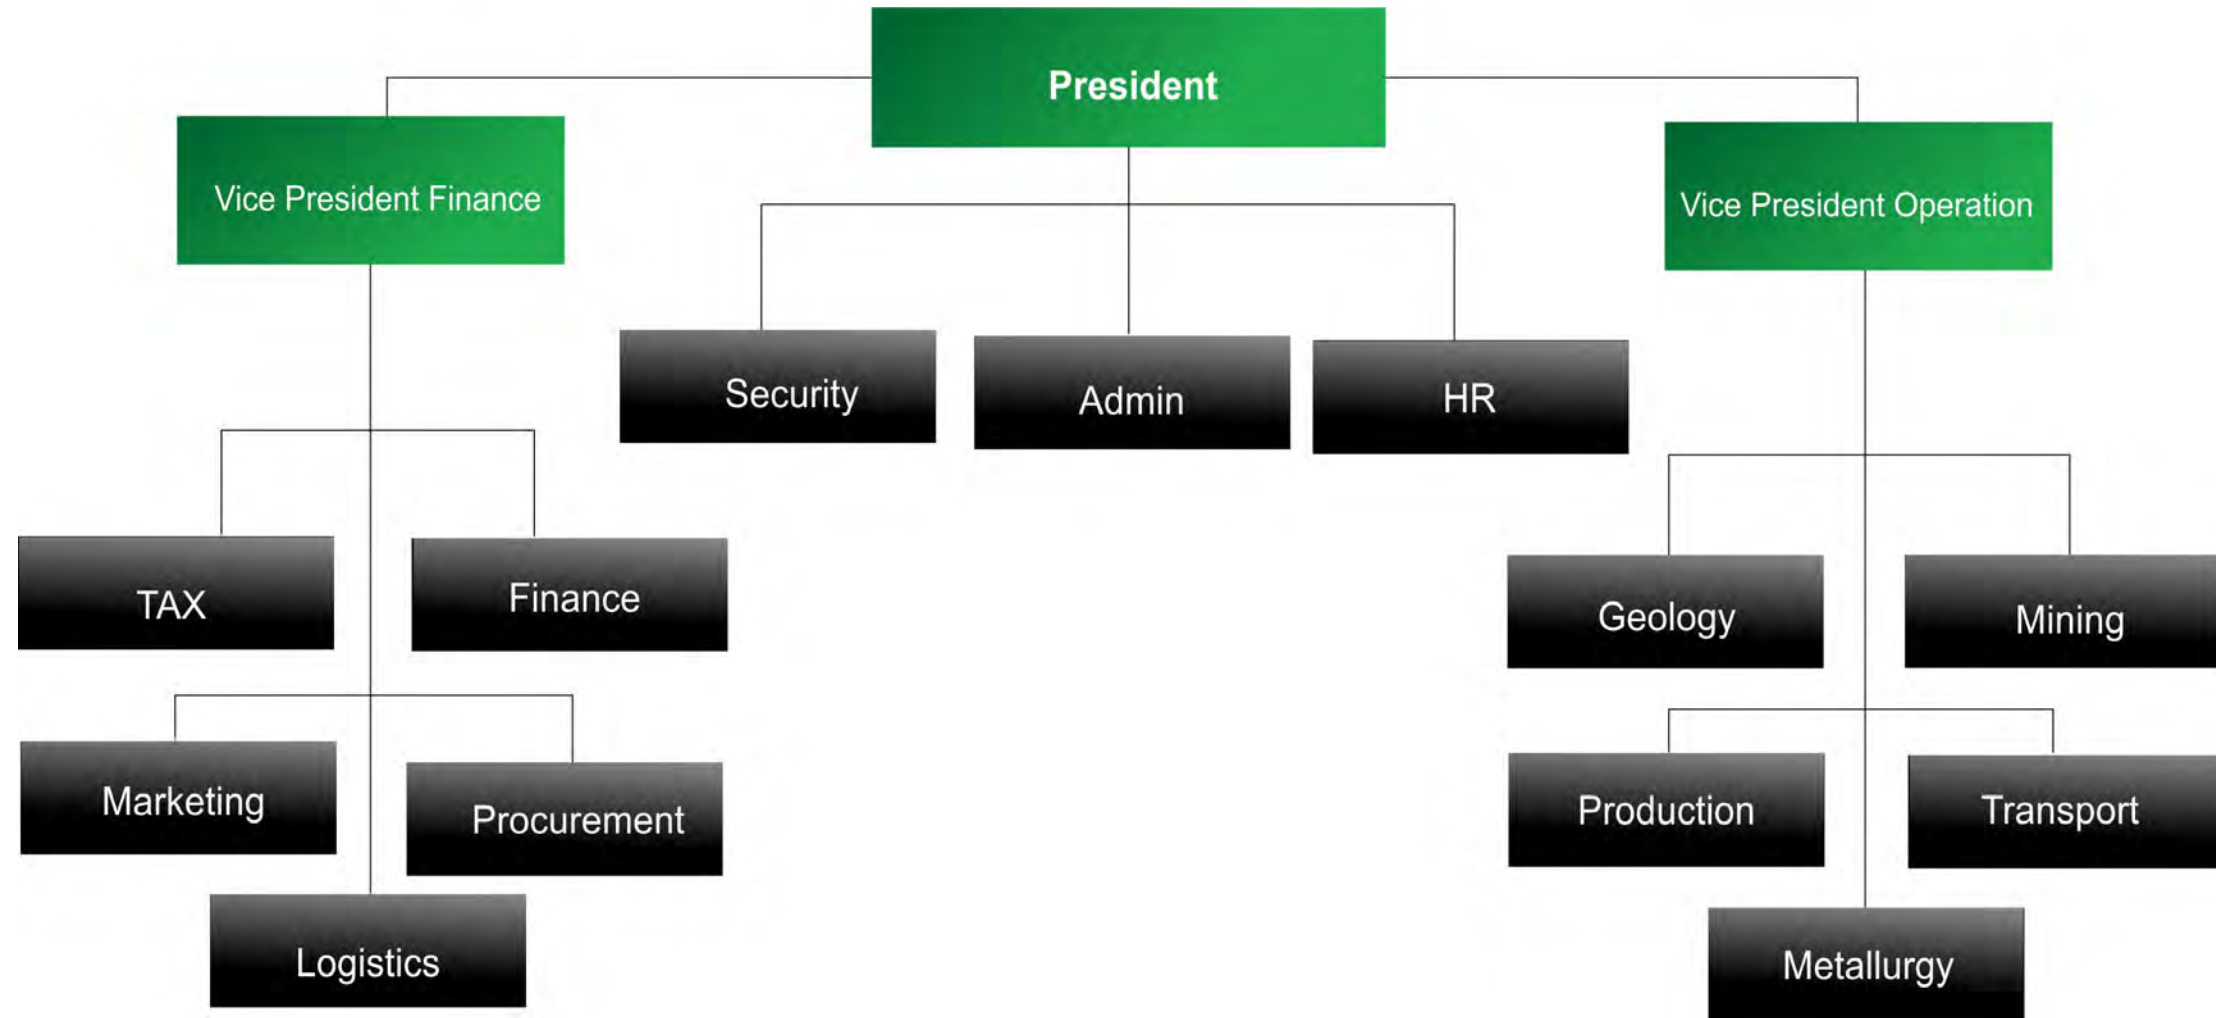

OUR REPUTATION IS BUILT ON A NUMBER OF KEY STRENGTHS:

- Ability to deliver at an international level
- Core focus based around sustainability and local community development
- Experience to further develop the mining industry within the region

ORGANIZATIONAL CHART

AMANIA MINING

BAKHUD FLUORITE DEPOSIT

Bakhud Fluorite deposit is located in Kandahar Province, Nish District in Southern Afghanistan. The deposit holds a reserve of 8,800,000 million tons, averaging 47% CaF₂.

Production began in 2014 and we are currently supplying large quantities of **metallurgical** fluorspar grade to international markets.

Our processing facility is vastly expanding and the sales of acid-grade fluorspar is planned for 2016.

We are one of the first Afghan mining companies to complete detailed exploration, build an international standard process site, and commence with international supply.

Our mine is in full development and we have commenced off-take agreements with multinationals across Europe and Asia.

- **Reserve** - 8.8 Million Tons
- **Lifecycle of mine** - 20 Years
- **Products available** - Metallurgical grade
(Acid-grade planned for 2016)

07

COMMUNITY OUTREACH AND DEVELOPMENT

We believe the future of Afghanistan is through commercial industry development. Our project has brought opportunities and development to even the most rural areas of Afghanistan, that has only ever seen limited commercial prospects. We are able to hire from local communities, support local business growth and sustain a strong economic support element. Our work has laid the foundation for Afghanistan and its people to prosper from the international environment.

AMANIA MINING IS ACTIVE IN THE LOCAL COMMUNITY:

- **Community communication:** Our programmes ensure the community are educated on the benefits of our mining project and the added benefits it brings to the community.
- **Community recruitment:** For the first time in rural areas we are able to offer local communities strong employment foundations to allow economic support to a range of families.
- **Training and education:** We train, develop and mature with our staff to set a standard of professionalism and ethics.
